## Report of Medical Officer of Health For the Village of Grimsby

Ortmoby, November, 1917.

Arthur Henry, Hog., Chairman, Local Bourd of Health, Village of Grimshy.

Doar Bir :-I beg herewith to hand you my report for the present year.

COMMUNICABLE DISEASES. During January and February we were visited by an epidemic of Measles This disease is difficult of suppression when once it gots a start, and the name may be said of Whooping-Cough. Both of these diseases, at the begin-ning, resemble ordinary colds. This is the stage when both are most contagious, if we had power to quarantine all children and grown-ups, when suffering from ordinary colds, we could to a great extent prevent epidemicof Monsies and Whooping Cough.

Teachers would be quite justified in sending home-from school children who came with coughs and red watery eyes, etc. Cuids are contagious, and no child should be permitted to give a cold to his or her sch

Although several cases of "Whooping-Cough" and "Mumps" occurred at intervals during the year, it cannot be said that they became caldenic. This may have been due to the strict isolation of patients and us the," which, with the co-operation of all physicians and teachers and parents, the Board of Health was enabled to curry out. We have fortunately been free from Dightheria and Scarlet Pever. The greatness of the fact that the "Provincial Board of Health" supplies gratuitously, Diphtheria Anti-texin, Small-Pox Vaccine, Tetanus Antitoxin, Anti-Meningitis Serum, Anti-I shold Vaccine and Pasteur's Preventive Treatment for Rubles, should be gra efully appreciated and acknowledged by all the fathers and mothers in the Province.

#### SEWAGE DISPOSAL

I've lag to the generosity of Mr. Ernest Woolverton in removing a dwelline nouse owned by him in the year of the station of the H. C. & R. Railway. and also by his liberal expenditure of money in conjunction with the Railway Company, the travelling public will have the benefit of one of the most up-to-date sanitary conveniences and tollet rooms in the country.

As regards private residences, many now have orthodox Septic Tanks. ome have coment pits, which can be easily disinfected and cleaned, some use the "Red Cross" plan. Kitchen sink sewage generally has a separate system of disposal, as it always should, by a "grease trap" and ultimate field tile distribution in the garden. At least one Pactory (itadient) is using the "Iroft "Tank" system with "chemical" solution.

#### WATER SUPPLY

### The Leather Situation is Serious

Leather is constantly advancing in prices and all leather goods are accordingly rising in prices. Boot and Shoes among other articles.

It will pay handsomely to lay in a stock of these goods now as there is nothing in view ahead but still higher prices.
